July 18, 1990

Hon. William K. Reilly
Administrator
Environmental Protection Agency
401 M Street SW
Washington, DC 20460

Dear Mr. Reilly:

It has come to my attention that the Environmental Protection Agency is considering permitting the use in this country of a gasoline performance additive known as HiTEC 3000. I am advised that at a recent public hearing the Commission received evidence to the effect that this additive can play a substantial role in reducing nitrogen oxide and other harmful automobile emissions.

As I am sure you know, air pollution--and, in particular, the contribution of automobiles to air pollution--is a major concern in all metropolitan areas, including those in Kentucky. It is, therefore, absolutely essential that responsible government agencies pursue all available options for dealing with the air pollution problem expeditiously. Consequently, I hope the Environmental Protection Agency will give prompt consideration to this additive for use in the United States.

Sincerely,

A handwritten signature in cursive script, appearing to read "Bill Lear".
